PROJECTS

SwiftCart

React Native

SwiftCart is a React Native shoe shopping app with Reanimated animations and Expo Router navigation. Powered by Supabase, it offers secure authentication, real-time order tracking, and a seamless checkout. Built with TypeScript, Tailwind CSS, and Supabase Auth, it uses Context API for efficient state management, ensuring a fast, intuitive, and secure shopping experience.

Workout Application

React Native

FitSmart is a **React Native** workout app designed to solve the **high cost of gym trainers** by providing **expert-designed workout plans for free**. Built with **Reanimated, Expo Router, Supabase, JavaScript, Tailwind CSS, and Context API**, it enables users to **exercise without a trainer, track progress in real-time, and follow goal-based routines**. With a **seamless UI and structured guidance**, staying fit has never been easier
